

Insulblind units offer great flexibility, style and energy efficiency. The units are completely UV stable and protected from dust, dirt and moisture.

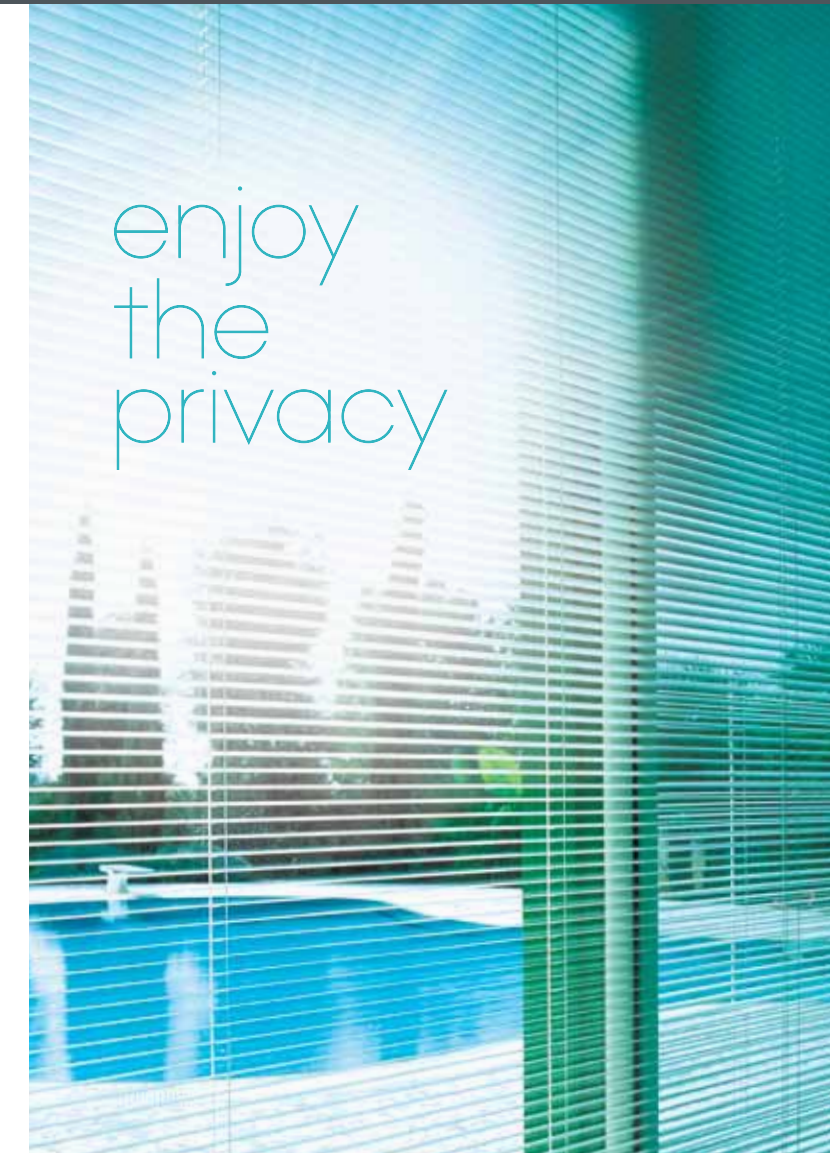

It is an integrated system that seals a blind permanently in a double glazed cavity.

Product benefits include:

- No risk of damage
- Maintenance free
- Guarantees privacy
- Durable components
- Excellent light and solar control characteristics
- Range of colours available

Insulblind is a must for commercial projects such as hospitals, motels and special accommodations, or residential projects where privacy and hygiene are paramount.
